##### I. Introduction

On July 22, 2021, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate a rulemaking proceeding to

consider changes to analytical principles relating to periodic reports.<sup>1</sup> The Petition identifies the proposed analytical changes filed in this docket as Proposal Four.

## **II. Proposal Four**

*Background.* The Postal Service currently develops the distribution factors used for the Special Purpose Route (SPR) city carrier cost pools based on manual data collection through the City Carrier Costing System SPR subsystem (CCCS-SPR). The Commission approved the use of this subsystem in Order No. 339, and it has been used each year since FY 2009.<sup>2</sup>

*Proposal.* With Proposal Four, the Postal Service seeks to replace the CCCS-SPR subsystem with a new system called the Special Purpose Carrier Cost System (SPCCS). The Postal Service cites two objectives for this new system: “to replace manual sampling with scan data from Product Tracking and Reporting (PTR) combined with the clock rings from the Time and Attendance Collection System (TACS)” and to “separate the weekday SPR cost pool into peak and non-peak pools and provide separate distribution factors for each cost pool.” Petition, Proposal Four at 2.

With respect to the first objective, the Postal Service plans to use PTR delivery scans that occur within time blocks when a city carrier is clocked to Management Operating Data System (MODS) Operating Codes specific to Special Purpose Routes. *Id.* The Postal Service proposes to use a sample of

time blocks “[d]ue to the disproportionate resources required to obtain a complete nationwide census.” *Id.*

Regarding the second objective, the Postal Service proposes to disaggregate the volume variabilities used for the SPR Monday through Saturday cost pool in order to create separate non-peak and peak weekday SPR cost pools. *Id.* at 3. The Postal Service also proposes annual updates to the hours used to weight the new weekday non-peak SPR cost pool variabilities. *Id.*

*Impact.* The impacts of Proposal Four are outlined in Table 1 of the proposal. *Id.* at 7. The most significant change in unit costs is a decrease of \$0.1743 for Collect on Delivery Service. *Id.* The unit cost of USPS Marketing Mail Parcels would increase by \$0.0151, from \$0.238 to \$0.254 per unit. *Id.* The unit cost for total domestic market dominant services would decrease by \$0.0144 per unit. *Id.*

### **III. Notice and Comment**
